

Recombinant Human Platelet Derived Growth Factor-AA (rHu PDGF-AA)

Lyophilized (1 mg) Cat # AK9711-1000

P 1

Product Description:

Akron's Recombinant Human Platelet Derived Growth Factor-AA (rHu PDGF-AA) product is manufactured following all relevant cGMP guidelines for ancillary materials. Akron's rHu PDGF-AA is a dimeric, approximately 29 kDa, glycosylated growth factor analog expressed in Yeast. The lyophilized product is packaged into vials. *In vivo*, PDGF-AA is part of the PDGF family, consisting of various dimers that have similar functions. PDGFs play an important role during embryonic development, stimulating and controlling the populations of mesenchymal stem cells (MSCs) and their progenitors. They have also been shown to affect osteogenic differentiation and proliferation of oligodendrocytes. PDGF functions have overlap with vascular endothelial growth factors (VEGFs) and epidermal growth factor (EGF). It has been used to study and develop technology in tissue regeneration and wound repair. Akron's cGMP-compliant rHu PDGF-AA can be used to promote the *ex vivo* expansion of MSCs and various mesenchymal progenitor cells.

Product Features:

Active Substance

- Negligible BSE/TSE risk from all media components
- High Purity ($\geq 97\%$)

Manufacturing

- All raw materials are compliant, controlled, and traceable under Akron's Quality Management System (QMS)
- Yeast expression system

Quality

- Relevant cGMP guidelines used in manufacture, testing, and release
- USP <1043>, Ancillary Materials for Cell, Gene, and Tissue-Engineered Products
- ISO 13485:2016, Medical devices - Quality management systems - Requirements for Regulatory Purposes
- ISO/TS 20399-1-3:2018, Biotechnology - Ancillary Materials Present During the Production of Cellular Therapeutic Products

Release Testing:

- Appearance
- Protein Content (Quanti-it Protein Assay)
- Protein Content (Bradford Assay)
- Purity (Reducing SDS-PAGE)
- Purity (Non-Reducing SDS-PAGE)
- Biological Activity

Recombinant Human Platelet Derived Growth Factor-AA (rHu PDGF-AA)

Lyophilized (1 mg) Cat # AK9711-1000

P 2

Stability:

- Currently under long-term stability program
- Store at -20 °C
- Transport with cold packs

Reconstitution:

Reconstitute the lyophilized product in sterile water to a concentration of 0.1-1.0 mg/mL. Avoid multiple freeze-thaw cycles.

For Use Statement:

For research use or further manufacturing use in *ex vivo* cell therapy applications. This product is not intended for direct *in vivo* use or for direct clinical use as a drug, therapeutic, biologic, or medical device.
